

Food for Thought – Nutritional Psychology & the Role of Nutrition in Mental Wellness

Shawn Talbott, PhD, CNS, LDN, FACSM, FAIS, FACN
Chief Science Officer, Amare Global

Outline

1. Nutrition plays well-known effects on "physical health and wellness" - including cardiovascular, musculoskeletal, and cellular.
2. Less well-known are the effects of nutrition on "mental" health and wellness - including depression, anxiety, pain, and burnout.
3. The emerging field of "Nutritional Psychology" describes the biochemical/physiological basis for the behavioral/psychological effects of nutrition and lifestyle choices to impact mental wellness.
4. This presentation will describe research-supported nutrition modalities to positively influence mental wellness - including pre/probiotics, plant polyphenols ("phytobiotics"), essential fatty acids, and traditional herbal therapies.

MENTAL WELLNESS

OUR MISSION

We create natural mental wellness products for a community of passionate people who desire an extraordinary life

Where are you on the Mental Wellness Continuum?

1. How you feel is not just in your head – it's also in your gut.
2. Our "second brain" includes the Microbiome and plays a major role in Mental Wellness.
3. You can DO something to improve your Mental Wellness by optimizing your GBX.

Where are you on the Mental Wellness Continuum? *(Circle your current number)*

GRIM REALITY

- Americans spend over \$100 billion annually on “feel better” products, from painkillers and anti-depressants to alternative and complementary therapies
- 100 million Americans suffer from chronic pain – this is one of the top reasons for the \$100 billion expenditure
- 350 million people globally are affected by depression each year – another major reason for the \$100 billion expenditure
- 90% of adolescents have a depressive disorder before the age of 18

GRIM REALITY

- 800,000 people die of suicide each year – that's over 2000 suicides per day
- 24 million people, some as young as 12 years old, received treatment for illicit drug or alcohol abuse in 2016
- 1 in 5 new mothers in the U.S. report postpartum depression each year
- The World Health Organization calls stress "the health epidemic of the 21st century"
- 85% of the nation's 20 million college students reported feeling overwhelmed by stress - and more than 35% reported feeling "depressed" to the point of dysfunction

Out-of-pocket costs for CAM among adults ~\$34B

U.S. consumer supplement sales
= \$52.5B by 2020

Hypothalamus = homeostatic interface between electricity of nervous system & hormones/neurotransmitters of endocrine/immune systems

Multi-Factorial Problem

Multi-Factorial Solution

The NEW Science of Mental Wellness

Science has forever focused on the BRAIN as the primary source to addressing mental wellness problems & answers.

We've been relying highly on antidepressants and other forms of serotonin reuptake inhibitors (SSRIs) to resolve these issues.

BUT IS THIS THE RIGHT SOLUTION?

RECENT SCIENTIFIC DISCOVERIES

- Science now tells us that we actually have a **SECOND BRAIN**!
- There has been a massive scientific shift towards the **MICROBIOME**, also known as our gut and second brain, as being the source to addressing mental wellness issues.

The Forgotten Organ

Microbiota:

100 trillion cells
~0.9 kg – 2.7 kg

Brain:

100 billion cells
~1.2 kg

Heart:

~0.3 kg

DID YOU KNOW?

- **90% of the cells in your body are non-human**
 - Human genes = ~23,000
 - Bacterial genes = ~20 million (~1,000x **MORE** than human genes)
- **Microbiome is an ecological community of trillions of bacteria living symbiotically in/on our body**
 - "2nd Brain" = 3-4 lbs (approximately the same size as our 1st brain)

**YOUR GUT IS CONSIDERED
YOUR SECOND BRAIN**

amare™
GLOBAL

THE MENTAL WELLNESS COMPANY

HOW IMPORTANT IS YOUR MICROBIOME?

- Communicates with the brain to regulate health, weight, immune function, digestive function, mood, and overall mental health.
- What we put in our bodies affects the microbiome, which in turn affects our mind and other crucial bodily systems

IN BALANCE

Feeling Great

OUT OF BALANCE

Feeling fatigue, sad, tense, hungry, heavy, bloated, confused, stiff/sore

amare™
GLOBAL

THE MENTAL WELLNESS COMPANY

The microbiome plays an important role in the way you feel mentally & physically.

This explains why you have those "GUT-FEELINGS"

HOW DO YOUR "TWO BRAINS" COMMUNICATE?

Our "two brains" communicate through a highly extensive network, known as the **gut-brain axis (GBX)**.

NETWORK CONSISTS OF:

- "wires" – nerves
- "chemicals" – neurotransmitters/hormones
- "cells" – immune system

The GBX connects our **nervous system (brain)**, **immune system (axis)**, and **gastrointestinal system (gut)** with a vast array of cellular and biochemical messengers throughout the entire body, which include the microbiome, hormones, cytokines, and neurotransmitters.

Gut-Based Decision Making

Rational decision making:

- Slow, linear, objective, weighing multiple options (+/- lists), advice from others, evaluating data

Gut-based decision making:

- Rapid, intuitive, subjective, deeply personal,
- The “secret author of many of the choices and judgements [we]... make.” *Daniel Kahneman*

Antibiotic Consumption by the Numbers

- >73 billion doses worldwide yearly
- 258 million courses (833/1000) in USA (2010):
- 2.7 courses by age 2; 10.9 courses by age 10

Cancer

Metabolic syndrome

Brain structure and function

Cognitive impairment (Alzheimer's)

Depression

Why is a Mediterranean Type Diet Good for Your Health?

- **Good for your gut microbes:**
 - High ratio of plant to animal based foods
 - High ratio of plant based (unsaturated fats) to animal based fats
 - Anti inflammatory effects on the gut, brain and body
- High concentration of antioxidants and polyphenols produced by plants for their own protection (olive oil, red wine, roots, leaves) which require the gut microbiota to digest
- Social interactions

HEALTHY GUT HEALTHY MIND

TWO Brains?

Did you know that we have two brains? One in our head and one in our gut- the **2nd brain**. They are connected by a communication axis. The emerging science of the **Gut-Brain Axis** (GBX) indicates that many mental wellness issues originate as imbalances in the GBX.

100% Human

Did you know that we have ~100 trillion microorganisms across more than 10,000 different species (Microbiota) in our GI tract? Compare that to our ~10 trillion human body cells and we are only **10% human!** Those same microbiota have ~9 million genes (Microbiome) compared to our ~23,000 human genes.

Therefore based on gene count, we are **less than 1% human!**

THE MENTAL WELLNESS COMPANY

BAD vs GOOD

A Balanced Microbiome Supports:

BACTERIA

BAD Bacteria

Campylobacter Jejuni &
Salmonella Enterica
– Results in food poisoning and
inflammation

Enterococcus Faecium
– Causes post-surgical
infections and inflammatory
bowel conditions

Clostridium Difficile
– Creates effects ranging from
diarrhea to life-threatening
inflammation

GOOD Bacteria *

Lactobacillus Helveticus R0052 *
– Improves mood by decreasing
neuro-inflammation & increasing
serotonin metabolism

Bifidobacterium Longum R0175 *
– Enhances calmness by
decreasing anxiety indices &
enhances cognitive function

Lactobacillus Rhamnosus R0011*
– Reduces stress by lowering
cortisol exposure & improving
GABA neurotransmission

Healthy
Inflammatory
Balance

GLOBAL

THE MENTAL WELLNESS COMPANY

IT GOES BOTH WAYS...

The Brain Can Affect the Gut

"Butterflies in our stomach" form when we're in love or anxious

Fear or sadness makes us "sick to our stomach"

Acute stress can suppress our appetite (short-term), while chronic stress can increase appetite and cravings for comfort foods (stress-eating)

The Gut Can Affect the Brain

When we eat, receptors in the gut cause the release of enzymes to aid digestion

Gut cells, including microbiome bacteria, send signals to the brain via nerves and hormones to indicate hunger or satiety (fullness)

The gut produces as much as 60%-90% of neurotransmitters involved in mental wellness, including dopamine and serotonin

amare™
GLOBAL

THE MENTAL WELLNESS COMPANY

THE GUT BRAIN AXIS

The "**Axis**" between the Gut and the Brain coordinates communications

Nerves— such as the vagus nerve, provide a “hard-wired” connection between the gut and the

Cells— including the immune system, interact with the gut microbiota

Biochemicals – including hormones, neurotransmitters, and cytokines transmit signals through the blood stream

THE MENTAL WELLNESS COMPANY

Balance the GUT with NUTRITION

PROBIOTICS

Probiotic foods contain live “good bacteria” which support mental wellness and aid digestion. Examples include fermented foods such as yogurt, kefir, kimchi, kombucha, sauerkraut, miso, tempeh, and Probiotic supplements.

PREBIOTICS

Prebiotic foods contain fibers and carbohydrates that can be fermented and digested by gut bacteria to serve as a fuel source and encourage growth of beneficial bacteria. Examples include asparagus, bananas, green leafy vegetables, garlic, leeks, onions, chicory, ginger, and Prebiotic supplements.

PHYTOBIOTICS

Phytobiotic foods are rich in flavonoids which protect good bacteria and establish a hospitable environment for the growth of good and displacement of bad bacteria. Examples include apples, grapes, dark chocolate, and berries.

IS YOUR GUT HEALTHY?

A photograph of two women practicing yoga in a park. The woman in the foreground is wearing a light green tank top and dark leggings, with her hands in a prayer position. The woman in the background is wearing a light blue tank top and dark leggings, also in a yoga pose. They are standing in front of a wooden fence with a blurred background of trees and a building.

HEALTHY STATUS

- Normal behavior, cognition function, and emotional state
- Healthy levels of inflammatory cells and/or mediators
- Healthy gut microbiota

UNHEALTHY STATUS

- Alterations in behavior, cognition, emotion, nociception
- Altered levels of inflammatory cells and/or mediators
- Intestinal dysbiosis

INTRODUCING AMARE GLOBAL PRODUCTS

Amare's flagship product line features our most popular cornerstone products! The products are designed to improve every aspect of the gut-brain axis for optimal mental wellness.*

FUNDAMENTALS™

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

amare[®] FUNDAMENTALS PACK[™] CLINICAL STUDY

The Amare FundaMentals Pack has been clinically proven to:

Increase GOOD Bacteria in the Gut

=

INCREDIBLE BENEFITS!

28% higher Lactobacillus

30% higher Bifidobacterium

17% higher overall composite score[†]

which
leads to...

Lower tension by 45%*

Lower depression by 55%*

Lower anger by 54%*

Lower fatigue by 64%*

Lower confusion by 43%*

Higher vigor by 44%*

after 30 days, when compared to the placebo group

[†]The composite score is an overall average of many different aspects of microbiome balance, including Bifidobacterium, Lactobacillus, Akkermansia, Firmicutes/Bacteroidetes (F/B) ratio, and others.

THE MENTAL WELLNESS COMPANY

Probiotic Strains

Bifidobacterium bifidum (Bb-06)

- Maintains microflora balance by producing lactic acid and acetic acid to compete with “bad” bacteria (Staph. aureus, E. coli, Campylobacter jejuni, etc).

Bifidobacterium longum (Bl-05)

- Highly resistant to low pH and bile salts and is well-suited to the intestinal environment to help reduce inflammation. Helps reduce gastrointestinal discomfort caused by stress.

Lactobacillus acidophilus (La-14)

- Ferments carbohydrates to lactic acid, which competes with “bad” bacteria for adhesion spaces on the intestinal mucosa. Increases mineral bioavailability (incl copper, magnesium, calcium, and manganese).

Lactobacillus casei (LC-11)

- Wide range of benefits for improved digestion, reduced cholesterol, modulation of inflammation/allergies.

Lactobacillus rhamnosus (Lr-32)

- Promotes general GI health and function – especially beneficial to prevent/treat occasional diarrhea and constipation after probiotic treatment.

THE MENTAL WELLNESS COMPANY

WOULD YOU...

Feed a lion grass?

OR

Feed an elephant meat?

My own “Mental Wellness Diet” (MWdiet for short) is a super-charged version of the Mediterranean diet that addresses the 3 primary anti-depression factors:

1. Brain Nutrients (Vitamin B6, Omega-3 fats, Flavonoids, Tocotrienols)
2. Inflammation
3. Microbiome

DocTalbot's MWdiet Shopping List

Fresh Fruits & Vegetables

- Unlimited amounts – choose brighter options grown as close to home as possible
- Spinach
- Kale
- Cabbage
- Sweet potatoes
- Tomatoes
- Onions
- Leeks
- Garlic
- Asparagus
- Artichokes
- Peas (frozen is OK)
- Bananas
- Berries (frozen is OK)
- Pomegranates
- Apples
- Grapes (including red wine, in moderation)

Beans & Legumes (canned is OK)

- Black beans
- Kidney beans
- Garbanzo (Chickpeas)
- Lentils

Healthy Fats

- Extra Virgin Olive Oil
- Nuts – Cashews, Walnuts, Almonds, Macadamias, Pistachios
- Avocados

Whole Grains

- Oats/Oatmeal
- Whole Grain Pasta
- Quinoa
- Brown Rice

Dairy, Cheese, and Fermented Foods

- Greek Yogurt, Icelandic Skyr, or other yogurt (look for lower sugar and higher fat content)
- Whole Organic Milk
- Kefir
- Kombucha (fermented tea)
- Cheeses of your choice (in moderation)
- Sauerkraut (and other fermented veggies such as cucumbers/pickles, beets, carrots, turnips)

Proteins

- Salmon
- Chicken
- Eggs
- Shrimp (frozen is OK)
- Lean Pork
- Lean Beef (in moderation)

Herbs & Spices

- Turmeric
- Ginger
- Basil
- Rosemary
- Oregano
- Clove
- Sage
- Cayenne
- Parsley
- Thyme
- Saffron
- Cumin
- Coriander
- Paprika
- Cinnamon
- Allspice
- Nutmeg

Where are you on the Mental Wellness Continuum?
